

TAP A NEW ENERGY CLASS

GENOVA PANORAMA MC

Multidecks

A display cabinet which is already anticipating the pressing restrictions and the parameters for refrigerant gasses which will become compulsory in 2020. Genova Micro Channel is the sole “plug-in” refrigerated display case, fully conceived and manufactured by exploiting the “micro-channel” heat-exchange technology. This cabinet not only grants a significant consumptions cut but also a massive reduction of the gas charge. The above by using natural gas like Propane within the boundaries recommended by the imperative European Regulations in terms of security.
