GENOVA OVERVIEW OPEN

Multidecks

The GENOVA ultra low front integral multidecks, in its numerous versions and configurations, has been the best seller of the plug-in line for the PASTORFRIGOR group in the past years. However, this did not let the PASTORFRIGOR R&D team stop in its search for new challenges to overcome. Many tests have been carried out in a climatic chamber to make this already good product more efficient, to reduce consumption and improve the display volume and its finishes. Here comes the new GENOVA OVERVIEW line, made up of the versions: BT for frozen products, TN for fresh products and pre-packed meat.
