PERFORMANCE IN MOTION™

EXCELSIOR

Counters

The continuous search for technological innovation and new aesthetic lines has led Pastorfrigor to create the EXCELSIOR line. It is a new line of traditional remote service counters for the best display of fresh and pre-packed meat, with a large display volume and internal finishes in stainless steel. The new design lines and elegant shapes catch the eye, both in the display area and externally on the peculiar sidewalls and the decoration. The EXCELSIOR showcase is available with ventilated or double static refrigeration system for remote installation, but also with a system for use with CO₂ and glycol refrigerant. The semi plug-in DOUBLE STATIC configuration is brand new to get CO₂ and R290 double refrigeration, for the best performance together with energy saving and compliance with current regulations on refrigerant gases. Also for this line of showcases, the 180 cm high TOWER display unit is available, made up of 2 glass shelves plus a bottom shelf and with rear hinged doors which can be canalised with all the other modules.
